## BIG FALL ISSUE!

Introduction  
BY Robert K. Krandall

Welcome to, our 4th Issue of The UFOloger, we're sure that you will enjoy it! This article is just an introduction to tell you about the UFOloger. It will appear in every issue.

First, let me introduce your editors: Jim Villard and Dan Washburn. Their articles are spread throughout the magazine. Jim's articles deal mostly with Flying Saucers, or UFOs, and Dan's with the Occult and New Age Sciences.

They both asked me to ask you to send in dozens of letters of criticism, praise, and questions.

The UFOloger tries to cover all the latest news in the Saucer world: Conventions, latest sightings, letters, famous people, and all things of interest to our readers.

It is thought by your editors that Saucers and the Occult are closely related. Therefore, this magazine covers both. By the way, subscriptions are 6 issues for \$3.00 (a sample copy 35¢); a monthly saucer publication.

So, drop the UFOloger a line. We'll be waiting! Ooops - almost forgot the addresser!

THE UFOLOGER  
4001 Massachusetts Avenue, N. W.  
Suite 1004  
Washington 16, D. C.  
or  
3312 R Street, N. W.  
Washington 7, D. C.

\* \* \* \* \*

THE UFOLOGER INVESTIGATED?

During the summer, right after our last Issue of The UFOloger came out, your editor received a very mysterious telephone call. This call was from a man who claimed to be an Air Force Intelligence Officer, and he wanted to know all about your editors, and The UFOloger. When asked why, the mysterious person said that we were suspected of being a "leftist" organization because we published Major Wayne S. Aho's letter to General Twining, and in it we were attacking Secretary of the Air Quarels.

However, your editors are not paying any attention to this, for we have reason to believe that if the Air Force really decided to investigate us they would more likely than not come over and see us personally, rather than just call over the phone.

If the person who enjoys playing rather un-funny jokes on people, that is their own business. However, the thing that left the biggest impression was the fact that the practical joker didn't have the sense to make up a name to leave, because he didn't leave it. (When this phone call occurred, your editor was out of town, and when he returned, the message was waiting. Incidentally, the letter of Major Aho's that we published finally got an answer, but not from Gen. Twining. It was a typical reply from ATIC at Wright-Patterson Air Force Base at Dayton, Ohio. It was nothing but double-talk, as usual. As Major Aho asked us not to print the reply, we are not able to do so.

## CRYSTAL GAZING

by Dan Washburn

Crystal gazing has long been a favorite method of developing phycic powers. Let me tell you a little about the history of crystal gazing. In days long past, pieces of translucent quartz and polished pebbles were generally used. Polished metal would also be employed. In Australia the native shaman (soothsayers) frequently use flame, sparks, or glowing embers. In New Zealand, the natives employ drops of blood held in the palm of the hand. In South America, the natives use the polished surface of dark stones. The American Indians used water or shining bits of flint. During the middle ages, the magic mirror was used by soothsayers. Today these methods have evolved into our use of the crystal globe.

Let me explain just why we use any of these methods. The globe is used as a focal point of concentration. Inherent in all of us are the latent faculties of clairvoyance. Through concentration on the globe, an rapport condition with the astral plane is created. In other words, a light spiritual trance is developed in which the clairvoyant faculty soon stops being latent.

Once crystal gazing has been established, direct clairvoyant vision can be cultivated easily, from whence follows astral projection and higher forms of clairvoyant and psychic manifestation.

Remember, the crystal has no supernatural properties in itself. So don't buy an expensive one. A watch crystal placed upon a piece of black velvet will do just as well.

An old English author has set down a set of rules for crystal gazing which has never been improved upon. We bring them to you here, now:

1. Select a quiet room where you will be entirely undisturbed, taking care that it is as far as possible free from mirrors, ornaments, pictures, glaring colors, and the like, which may otherwise distract the attention. The room should be of comfortable temperature, in accordance with the time of the year, neither hot nor cold. About 60 to 65 degrees Farenheit is suitable in most cases, though allowances can be made where necessary for natural differences in temperaments of various persons. Thus thin, nervous, dedicated organized individuals and those of lymphatic and soft, easy-going, passive types require a slightly warmer apartment than the more positive class, who are known by their dark eyes, hair, and complexion, combined with prominent joints. Should a fire, or any form of artificial light be necessary, it should be well screened off, as to prevent the light rays from being reflected in, or in any manner directly reaching the crystal. The room should not be dark, but rather shadowed, or charged with a dull light, something such as prevails on a cloudy day when it is drizzling.

2. The crystal should be placed on its stand on a table, or it may rest on a black velvet cushion, but in either case it should be partially surrounded by a black silk or a similar wrap or screen, so adjusted so as to cut off any undesirable reflection. Before beginning an experiment, remember, most frequently nothing will be seen on the first occasion and possibly not for several sittings; though most, if strongly gifted with psychic powers in a state of unconscious, and sometimes conscious, degree of unfoldment, may be fortunate enough to obtain good results at the very first trial. If, therefore, nothing is perceived

During the first few attempts, do not despair or become impatient, or imagine that you will never see anything. There is a royal road to crystaline vision, but it open only to the combined password of calmness, patience, and perseverance. If at the first attempt to ride a bicycile, failure ensues, the only way to learn is to pay attention to the necessary rules, and to persevere daily until the ability to ride comes naturally. Thus it is with the would-be seer. Persevere in accordance with these simple directions, and success will sooner or later crown your efforts.

3. Commence by sitting comfortably with the eyes fixed before the cyrstal, not by a fierce stare, but with a steady, calm gaze, for ten minutes only, on the first occasion. In taking the time it is best to hang your watch at a distance, where, while the face is clearly visible, the ticking is rendered inaudible. When the time is up, carefully put the crystal away in its case, and keep it in a dark place, under lock and key, allowing no one but yourself to touch it. At the second sitting, which should be at the same place, in the same position, and at the same time, you may increase the length of the effort to fifteen minutes, and continue for this period during the next five or six sittings, after which the time may be gradually increased to one hour, but never exceeding that hour. The precise order of repetition is always to be followed until the experimenter has developed an almost automatic ability to readily obtain results, when it need no longer to be adhered to.

\* \* \* \* \*

4. Any person, or persons, admitted to the room, and allowed to remain while you sit, should (a) keep absolute silence, and (b) remain seated at a distance from you. When you have developed your latent powers, questions may, of course, be put tp you by one of those present, but even then in a very gentle, or low and slow tone of voice; never suddenly, or in a forceful manner.

5. When your crystal finally begins to look dull or cloudy, with small pin-points of light glittering threin like tiny stars, you may know that you are commencing to obtain that which you seek - vis., crystaline vision. Therefore, persevere with confidence. This condition may or may not continue for several sittings, a crystal seeming at times to alternately appear and disappear, as in a mist. By and by, this hazy appearance, in its turn, will give place, quite suddenly to a blindness of the senses to all else but a blue or blueish ocean of space, agaist which, as if it were a background, the vision will clearly apperent.

6. The crystal should not be used soon after taking a meal, and care should be taken in matters of diet to partake of only digestible foods, and to avoid alcoholic beverages. Plain and nourishing food, and outdoor exercsie, with contentment of mind, or love of simplicityin living, are great aids to success. Mental anxiety, or ill health or not conductive to the desired end. Attention to correct breathing is important.

7. As regards the time at which which events will come to pass, each seer is usually impressed with regard thereto; but, as a general rule,

visions appearing in the extreme background indicate time more remote, in the past or future, than those perceived close at hand, while those appearing in the foreground, or closer to the seer, denote the present or immediate future.

2. Two principle classes of vision will present themselves to the sitter---(a) the Symbolic, indicated by the appearance of symbols such as a flag, boat, knife, gold, etc., and (b) Actual Scenes and Personages, in action or otherwise. Persons of a positive type of organization the more active, excitable, yet decided type, are most likely to perceive symbolically, or allegorically; while those of a passive nature usual receive direct or literal revelations. Both classes will find it necessary to carefully cultivate truthfulness, unselfishness, gratitude for what is shown, and absolute confidence in the love wisdom, and guidance of God himself.

(Addenda::: Relaxation is also a key note. So, just before your sitting, relax yourself entirely, and put yourself in a receptive mood. Take several deep breaths, and then begin your concentration upon the crystal. Try and regard the crystal as a doorway to higher planes of existence.

GOOD LUCK!!

#### The Staff of The, UFOloger

James Villard - Editor  
 Dan Washburn - Editor  
 Robert K. Krandall - Technical Advisor  
 Andre A. Pizzini - Staff Artist

#### THE EDITORIALS....

Well, friends, here we are again with another issue of The UFOloger. We wish to call to your attention the fact that we are now going to have covers such as you see on this issue, as a result of the UFOloger aquiring Mr. Andre A. Pizzini as our staff artist. He formerly worked as an artist for N. B. C., Television studios here in Washington. We hope that you will enjoy our covers from now on.

Perhaps our readers have noticed the latest issue of Amazing Stories Science Fiction. If not, rush down to your nearest newsstand and pick up a copy right away. It has millions and millions of saucer articles. They are done by such famous people as: Ray Palmer, Gray Barker, Richard Shaver, (yes, the Richard Shaver of dero and tero fame!) Oliver P. Ferrall, and Kenneth Arnold, the man who started the word "flying saucer". There are also two fiction stories in it, dealing with saucers. There are also many other people who wrote in Amazing Stories. The editor of that publication, Paul Fairman, mentioned, however, that next month their magazine will "return to normal". But, he added, as there was not enough space in this particular issue, they would publish a list of available books in the saucer field next month. Their next issue will be on the stands October 10. We suggest you get a copy of this, too, as it looks good.

Fantastic Universe Science Fiction, not to be outdone by Amazing Science Fiction, also put out a saucer issue. Besides the usual article by Civilian Saucer Intelligence of N. Y. and Ivan T. Sanderson, there is one of the best articles your editor has ever read, almost. It is calidd,

"Meet The Extraterrestrial" by Isabel Davis. Although it tries to expose all the 'contactees', it is really very well written, and your editors recommend it highly. They have also taken up reviewing saucer books in their book review section. We hope this good work keeps up.

We have heard that Gray Barker has gone to England to the World Science Fiction Convention in London. He is rumored to be going for Ray Palmer, who published Flying Saucers From Other Worlds. It is said that about 60 people who were going to the convention hired a plane to take them across the Atlantic. It cost them only 130.00 dollars apiece. The convention was over the Labor Day weekend, but Gray Barker has not yet returned from London. He went with two friends of his, Howard Neuberger, and Roger Pierce, who published Cosmic News, which has now combined with Gray Barker's Saucerian Bulletin. If our previous readers remember, we printed Howard Neuberger's letter in the last issue of the UFOloger. Mr. Neuberger also publishes a paper called "The Silence Group and The Christian". This is a sort of fanatical publication, dealing mostly with the so-called International Bankers, and that the world is coming to end in three years. Our only comment is: "O, Well!!!". (Note: The UFOloger has received information from a reliable source, which claims that Gray Barker invented the "International Bankers" and the whole thing is a hoax. The source stated that Gray Barker originally told Neuberger and Pierce about them, and the poor kids believed him. The UFOloger does not necessarily take on the views of the source.)

BOOK REVIEWS  
by Robert K. Krandall

THE EXPANDING CASE FOR THE U.F.O. by M.K. Jessup

This latest book by Mr. Jessup, ranks along with his other books The Case for the UFO, and The UFO Annual. It is the opinion of your editors that this book is truly one of the very best. It gives many interesting facts about the moon, the pyramids, and pygmies that are supposed to have come from another planet. It is written in a style that is very easy to read, and I found that I could hardly put it down once I had started. Included are many charts and illustrations as well as photographs of the famous "moon-craters" of Mexico. We advise getting this book very much, as we feel that it is a must for all serious U.F.O. researchers. Along with this comes a free booklet called, "The U.F.O. Dictionary", also by Mr. Jessup, giving a resume of all U.F.O. terms now in use. Citadel Press, N. Y. \$3.50.

THE REPORT ON U.F.O.s by Edward J. Rupplet, former head of Project Bluebook. We can supply this book to our readers at the low, low, price of \$2.25.

Your Editors of The UFOloger wish to express their special thanks to Robert Kensington Krandall, our Technical Advisor, for a job well done on the 3rd Issue of The UFOloger, which he did while we were out of town. Thanks Bob!!!

\* \* \* \* \*

LOCAL NEWS.....

On Tuesday, August 27, here in Washington, people interested in saucers gathered at the apartment of Mrs. Dorothy Deleahanty to listen to tapes of the renown trance medium Enett Braeley of Daytona Beach, Fla. and her contacts with the Space People as presented to us Mr. Robert Ewing, who regularly tapes the seances of Mrs. Braeley, and sends them to Major Aho who is at the moment in Daytona Beach conferring with Bob Ewing. Among the tapes heard were discussions with Flying Saucer pilots, who said that Venusian Flying Saucers are called "ventlas". He also said that the ventlas could nullify friction, thereby explaining their high speeds through the air without being burnt to a crip. He also went into the details of the construction of such ships, etc.

Bob Ewing had recently been to the Pentagon and played the tapes with Major Aho to high Pentagon officials, among which was Admiral Fahrney, who is on the Board of Governors at NICAP. (The National Investigations Committee on Aerial Phenomena.) (Note: The Pentagon later released a bulletin to a local radio station a few days ago that, "Major Aho is not very convincing, and, as one official put it, "That is the understatement of the year."".)

Some more of the tapes were discussions with Cymatrali, a Master Teacher from the planet Venus.

Bob Ewing is considering sending down some of his tapes to Dr. Dittmar of The Tape Recorded UFO Information Service in Au Sable Frks, New York, to be released to the public. We hope he will.

Con't next column.....

SPACECRAFT CONVENTION  
HELD IN WASHINGTON, D. C.

On September 13, 14, 15 The Cosmic Circle of Fellowship held their annual space-craft conference here in Washington at the New Colonial Hotel. The Director and High Priest of The Cosmic Circle is Mr. Willaim Fergusen. There are several units of the orginization, the units which are called "Circles", spraed throughout the country. Mr. Fergusen claims to have had contacts with space beings, and has been to Mars, as well as many other planets of our solar system.

Among the speakers were, Major Wayne Aho, who gave a very interesting talk entitled, "Cosmic Ambassadors". There were some very nice dances done, to introduce each session. Tapes of all sorts were presented to the group. There were many other interesting speakers as well.

Another thing that caused a big hit at the Conference were the "Happy Holders", which are supposed to focus Cosmic Energy on the person holding the objects. Your editors both tried these, and we say to you, "They really do work!!!!".

During the Conference, on Saturday the 14th, at 8:05 pm, a space-ship passed over the conference, being chased by a squadron of jets. We have not been able to get this confirmed by the Air Force yet.

Another thing that was noticed, was that on the night on the Conference, there was not one single crime committed in the Metropolitan Area all day and all night long, which is quite amazing, even for a coincidence!! On the whole, it was lots of fun, and there were lots of very nice people there.

#### A T T E N T I O N!!

The UFOloger is trying to  
increase its circulation! There-  
fore, we are advertising in FATE  
MAGAZINE. Look for our ad in  
the December Issue!

Say not, "I have found the truth,"  
but rather, "I have found a truth."

Say not, "I have found the path of  
the soul." Say rather, "I have met  
the soul walking upon my path."

For the soul walks upon all paths.  
The soul walks not upon a line,  
neither does it grow like a reed.

The soul unfolds itself, like a  
lotus of countless petals.

The Prophet - Kahlil Gibran.

God is a reflection of All  
and

All is a reflection of  
God.

#### SAUCER SIGHTINGS,...

Luminous Object Seen Over London  
London, September 18 (AP)-----  
North London residents saw a cigar  
shaped, blue-green object moving  
rapidly over the city early today,  
the Air Ministry said today.

A Ministry official said three out  
of four descriptions of the luminous  
object were exactly the same. The  
Ministry refused to speculate on the  
report. 19/9/57, Wash. Ev. Star.

#### Saucers Seen Over Washington!

Washington, D.C., August 5-----

Saucers were seen today over  
Silver Spring, Md., a suburb of  
Washington, D.C. at 8:25 p.m. A  
great many phone calls were rec-  
eived at the Police Station. One  
report said that the saucers came  
into view directly overhead and  
were seen at that time by more  
than a dozen people. There were  
seven of them, flying in a "V"  
formation, like the famed "Lubbock  
Lights" of Texas. They were round  
with no sharp edges, and they  
were brighter than any star, and  
their color was like that of the  
white of the moon. One viewer  
called the sight, "Majestic!".

Going on, they were next seen  
over Wheaton, Md. The estimated  
altitude was about 50,000 to 75,000  
feet. Most people saw them only  
for about 4 minutes, until they  
faded into a light just above the  
horizon.

It was reported later that night  
that a mother-ship (cigar shaped)  
was witnessed by a group of ob-  
servers through binoculars. -----

Courtesy Washington Saucer  
Intelligence.

Chicago, Ill., September...,  
Professor Clyde Tombaugh, who  
discovered the planet Pluto in 1930

today released a statement saying that he believes that life does exist on other planets. He said that we would be "egotistical" to think that we were the only existing life form of intelligence in the Universe.

#### THE JUNIOR SKYWATCH OF THE AMERICAS

**YOUTH!!** Every young person in Canada, the United States, Mexico, and Central and South Americas is invited to join the JUNIOR SKYWATCH OF THE AMERICAS. It is anticipated the enthusiasm of youth will kindle a sympathetic interest among the components of the J. S. A. in social, cultural, economic and political backgrounds of each of the countries in the Western Hemisphere and that this interest will mean much to the new world emerging when the young people reach the years when they will take over the molding of the affairs of the Americas. The simple acquaintances and friendships engendered by such activities as those of the J.S.A. will foster the understanding which is essential to bring about the better acquaintance basic in developing the welfare of the Hemisphere.

**OBJECTIVE:** The objective of the J.S.A. is to organize groups of young people to observe, report, and study aerial phenomena, astronomy, meteorology, particularly the unknown flying objects of various types, and the study of weather variations reflected in the cloud patterns and in the atmospheric disturbances; also, the J.S.A. is expected to supply satellite watchers to do their bit in the International Geophysical Year.

**MEMBERSHIP:** For \$1.00 you may be enrolled as a member. You will

receive the Junior Skywatch Newsletter and will be eligible to form your own Post, and attend the Local, National, and Hemispheric meetings.

Send your application to:  
**THE JUNIOR SKYWATCH OF THE AMERICAS**

1636 Connecticut Avenue, N. W.  
Washington 6, D. C.

In time you will receive your membership card and instructions for forming your own Post.

Interest and support of all adults and organizations interested in giving a hand to the young people will be welcomed.

**"KEEP YOUR, EYE ON THE SKY"**

#### BACK ISSUES!!

Anyone desiring back issues of The UFOloger, we can still supply a few copies of Issues Nos. 1, 2, and 3 at 40¢ per copy.

The UFOloger wishes to state that none of the opinions that we print are necessarily those of THE UFOLOGER.

#### WHATS ALL THE FUSS ABOUT JAMES MCSELY??!

by James Villard

Lately there has been more fuss and controversy over one James Mosely, who publishes "Saucer News". It seems that everyone has finally found someone to write about in their various magazines, that someone being poor James W. Mosely. The Saucerian Bulletin, The UFOloger, The UFO Newsletter, Uranus, and many more have all recently written articles about the man.

He has been accused of being in the pay of the US Air Force, a

Mosely, con't.

member of the "Silence Group", as well as many other things. We know that the Air Force has no J. Mosely listed.

Uranus has the theory that Mr. Mosely and Mr. Barker, (with whom he seems to be having a 'feud'.) are "Confidential Collaborators".

Mr. Mosely's magazine, Saucer news is really very good, and we reccomend it.

REVOLVING CONTINENTS ?!

Toronto, Sept. 13---The continents around the Pacific are revolving clockwise like the rim of a titanic wheel.

Either that or the floor of the sea itself is revolving while the continents stand still. Whichever way, eventually California and New Zealand may be where Japan is now. This may be a long, long, time. The speed of the whell is only about two inches a year, as determined in California by precise coast and geodetic survey measurements and similarly in New Zealand.

Evidence for this startling concept was presented to the International Union of Geodesy and Geophysics here today by Dr. V. H. Benioff, Professor of Seismology at California Institute of Technology. Certainly either ocean bed or surrounding continents are revolving but without many more measurements in such places as Communist China it is impossible to tell which, he said.

Man, with all thy getting, get understanding.....

Toronto, Sept. 12 (UP)---Aerial photographs have revealed a crater 400 miles in diameter in the Hudson Bay of Canada which compares in size with some of the great scars visible on the moon.

Dr. Peter Millman of the National Research Council said the crater was believed caused by a gigantic meteorite which plunged to the Earth about 500 million years ago.

He also said that there are many others of large size dotted across Canada. He admitted that scientists still lacked proof that the craters were caused by meteorites, but all the evidence pointed in that direction.

-----Wash. Post

Although this issue is not quite as big as we planned, we hope that you enjoyed it.

We have one request: If you see any newspaper clippings about saucers, or anything else you think the UFTCloger would be interested in, please send it in to us. We will really appreciate it.

The US Air Force received an average of one report per day on flying saucers during 1955.

(courtesy Saucer News.)

If you know of a friend who is interested in saucers, tell him about us...
